

EGR Valve Harness – Reroute –  
Service Action S666

MODEL 1996 MY  
XJR Sedan

VIN  
754304-776585

**ISSUE:**

A number of 1996 MY Sedan XJR vehicles within the above VIN range have the EGR valve wiring harness routed incorrectly.

**ACTION:**

Inspect all 1996 MY XJR Sedan vehicles within the above VIN range and re-route the wiring harness, so that possible contact with the EGR valve is eliminated.

INSPECTING AND RE-ROUTING EGR HARNESS

1. Check whether the harness is routed outboard or inboard of the air conditioning line (Illustration 1).  
If the harness is routed **outboard** of the air conditioning line as in the inset of Illustration 1, the routing is correct.  
If the harness is routed **inboard** of the air conditioning line as in the main illustration, the routing is **incorrect** and **must** be corrected.
2. Disconnect the harness connector (Illustration 1) from the EGR valve, and pull the harness downward until it is below the A/C line.
3. Re-route the EGR harness **outboard** of the air conditioning line as in the inset of Illustration 1. Reconnect the harness connector to the EGR valve. Make sure the harness is now clear of the EGR valve.
